Welcome to Centre Of Dental Excellence

Thank you for choosing Centre Of Dental Excellence for your specialist dental needs.

We are a state of the art dental referral centre that is committed to providing excellence in the fields of dentistry and facial aesthetics.

Just like your GP may refer you to a specialist (e.g. Cardiologist, Orthopaedic surgeon or Neurologist), your dentist may recommend a dental specialist for further advice and/or treatment. Following the referral, our team works very closely with your dentist until your treatment is completed.

Our treatments are carried out by experienced practitioners within their fields, including renowned specialists and consultants in dentistry, to ensure we provide you with the highest level of care.

All our specialists are involved in research, training and teaching dentists and dental care professionals (nurses, hygienists and therapists) in the industry. Our centre is equipped with state of the art technology including a cone beam CT scanner (Morita), Digital Microscopy (Global A6) and a training centre which hosts regular study clubs for dentists, hygienists and therapists.

We are proud to have an outstanding record of successfully treating and caring for our patients. Currently, over 200 dental practices refer to us. Our greatest reward is providing our patients with the self-confidence and comfort that healthy teeth can bring.

My team and I look forward to welcoming you to the practice.

Kushal Gadhia
Clinical Director at Centre Of Dental Excellence

Priyanka Jadav

Dental Hygienist & Therapist
BSc Dental Hygienist and Therapist
GDC No. 279080

YOUR REFERRAL JOURNEY

Step 1:

Your dentist sends us a referral letter (by post / online) with any recent x-rays and an outline of treatment to be carried out.

Step 2:

We contact you, using the details provided, on the same day we receive the referral.
We also acknowledge receipt of the referral by writing to your dentist.

Step 3:

Our team arrange a mutually convenient time and book your consultation.
Please note, we collect the consultation fee at the time of booking your appointment.

Step 4:

At the consultation appointment, you are greeted warmly by our welcoming staff. A full clinical assessment is carried out. This includes all necessary tests, intra-oral (small) x-rays, +/- intra-oral photos, details of treatment, cost options and a written estimate in detail.

Step 5:

A consultation report is sent to you and your dentist, with full details of the findings including what treatment is required.

Step 6:

We undertake any necessary treatment and ensure we provide you with the highest possible standard of care. During the course of your treatment, we encourage you to continue seeing your dentist for your regular check ups. We may ask your dentist to carry out some dental treatment to facilitate and expedite your care

Step 7:

On completion of your treatment, we write back to you and your dentist summarising and detailing the specialist dental care you have received.

Step 8:

If required, we continue to monitor you on an annual basis to review the outcome of your care.
This is on a case-by-case basis and is discussed with you during your treatment.

Step 9:

We look forward to receiving your comments (and compliments!) regarding your care. Please feel free to share your experience with ourselves and others, online, in writing and in person. The Centre of Dental Excellence is a specialist dental practice built on the recommendations of people like yourself. We continually strive to improve our service and welcome your feedback.
